Bug	First known from	Found by	In scope	Verdict	Evidence
STT					
Visibility-point/squash race (load channel)	This work	SimSpect	yes	real †	trace at slow commit timing; pre-fix, re-run
Pending-squash race: secret-dependent squash signal	N. Mosier (`cwfletcher/stt` @18e304f)	neither tool	partly	real, fixed upstream	upstream report
Tainted speculative store → D-TLB entry (KV3)	DOLMA, via AMuLeT	AMuLeT	no: store/TLB	not a bug ‡	AMuLeT
SPT-Fence					
Same visibility-point/squash race as STT	This work	SimSpect	yes	real	pre-fix run without branch forces; re-run
ReCon (STT scheme)					
`getOldestTaint`: an ALU result keeps only its oldest source's taint (OTB)	This work	SimSpect; re-confirmed by a hand-built test	yes	real, confirmed	hand-built test with trace; pre-fix, re-run
Store-to-load forwarding skips the taint check (STL)	This work	SimSpect	yes	candidate	one trace; pre-fix, re-run
InvisiSpec & CleanupSpec *collateral transmitter-side channels, out of SimSpect's scope*					
UV1, UV2, KV1: L1D eviction, MSHR contention, L1I speculative fetch	AMuLeT	AMuLeT	no	real	AMuLeT
UV3–UV5: post-squash L1D residue; cleanup evicts a non-speculative line	AMuLeT	AMuLeT	no	real	AMuLeT
SpecLFB					
First speculative load left unprotected (UV6)	AMuLeT	both (AMuLeT at test 39, SimSpect at test 6)	yes	real	SimSpect run pre-fix; re-run
